304 Stainless Steel Braided Cable Sleeving - Tubular

Features:

Made in the same manner as AA59569 (formerly QQB575) braid. The braid is manufactured to provide shield coverage of 90% minimum (70% for .078" and smaller) at the nominal diameters specified. We maintain inventories of Type 304 (non-magnetic) and Type 430 (magnetic) stainless steel wire. Stainless Steel braids are most widely used in corrosive or abrasive environments.

Dimensions

Part Number	Diameter	# Carriers # Ends
BSMET-SS-0125	1/8"	24/120
BSMET-SS-0188	3/16"	24/192
BSMET-SS-025	1/4"	24/312
BSMET-SS-0375	3/8"	48/336
BSMET-SS-050	1/2"	48/432
BSMET-SS-075	3/4"	48/720
BSMET-SS-100	1"	48/336
