Aerospace Grade Firesleeve Braided Cable Sleeving

Our firesleeve is high quality alternative to Aerospace Grade Silco Sleeve® Designed to protect hoses, wires and cables from the hazards of high heat and occasional flame. It protects continuously to 260°C/500°F and will withstand a molten splash at 1200°C/2200°F. Made of braided fiberglass yarns in a flexible substrate, it is then coated with a high grade silicone rubber. Resistant to hydraulic fluids, lubricating oils, and fuels, our firesleeve insulates against energy loss in piping and hosing; protects employees from burns; and allows "bundling" of wires, hoses, and cables. This braided version allows qualified hose assemblies to pass AS1055D testing under stated flow and pressure conditions.

Features:

- Continuous Operating Temperature: 260°C/500°F
- Available in sizes 1/4" to 4".
- Packaged in spools of 100fttand 100 feet
- Halogen Free, ROHS compliant
- Self Extinguising how it relates to the burning of materials
- Resists Gasoline, Engine Chemicals & Cleaning Solvents
- Made in U.S.A.
