Beaded Cable Ties

Beaded Cable Ties secure large bundles of wires easily and provide access to easily add new wires and cables. The simple lock and release design is easy to adjust and allows for efficient cable organization. Their color-coded design makes Beaded Cable Ties ideal for ID plates, which may be rotated long after first attaching. If space is a consideration, the beaded tail may be adjusted to custom-fit whatever project you are working on. Further, their polyethylene material is always flexible and easy to work with.

Features:

- Easy to install, adjust & uninstall
- Re-useable design for long-lasting use
- Colors available - Natural and Black
