Canusa CFM-D Medium Wall Adhesive Lined heat shrink tubing

What is Canusa CFM-D Medium Wall Adhesive Lined Heat Shrink Tubing?

Canusa Medium Wall Adhesive Lined Heat Shrink is the thinner counterpart to the Canusa Heavy Wall Heat Shrink. Thinner walls allow for more flexibility in tight quarters, while the Medium option still provides an insulating and abrasion-resistant covering for wires and cables.

What is Canusa CFM-D Medium Wall Adhesive Lined Heat Shrink Tubing Used For?

Canusa Medium Wall Adhesive Lined Heat Shrink is generally used for projects that require a little bit of flexibility, and protection from some environmental damage. This includes rain and abrasion. Due to this slight flexibility and medium protection, this product is generally used in slightly tight quartered machinery, but is not recommended for submersion or burial. However, adhesive provides extra insulation from cold.

Features:

- Protects and insulates wires and cables
- Adhesive insulates for added protection
- Medium wall provides flexibility
- Abrasion and UV resistant
- Simply shrink using heat gun

Dimensions

Part Number	Diameter	Piece
HS-CFM-D-0400	0.4"	4 FT/PIECE
HS-CFM-D-0750	3/4"	4 FT/PIECE
HS-CFM-D-1100	1.1"	4 FT/PIECE
