## Industrial Grade Firesleeve Braided Cable Sleeving

Our firesleeve is an alternative to Industrial Grade Silco Sleeve® designed to protect hoses, wires and cables from the hazards of high heat and flames. It protects continuously to 260°C/500°F and will withstand a molten splash at 1200°C/2200°F. Made of knitted fiberglass yarns in a flexible substrate, it is then coated with a high grade silicone rubber. Resistant to hydraulic fluids, lubricating oils, and fuels, The industrial grade fire sleeve insulates against energy loss in piping and hosing; protects employees from burns; and allows "bundling" of wires, hoses, and cables. This is the perfect cover to protect hydraulic hoses, pneumatic lines and wiring bundles.

### Features:

- Continuous Operating Temperature: 260°C/500°F
- Available in sizes 1/4" - 5"
- Packaged in boxes of 100 ft and smaller quantities
- Halogen Free, ROHS compliant
- Self Extinguishing
- Resists Gasoline, Engine Chemicals & Cleaning Solvents
- Knitted fiberglass substrate coated with silicone rubber
- Good abrasion resistance; very flexible
- Made in U.S.A.

### Dimensions

Part Number	Diameter
BSFI-025	1/4"
BSFI-0375	3/8"
BSFI-050	1/2"
BSFI-0625	5/8"
BSFI-075	3/4"
BSFI-078	7/8"
BSFI-100	1"
BSFI-1125	1-1/8"
BSFI-125	1-1/4"
BSFI-1375	1-3/8"
BSFI-150	1-1/2"
BSFI-1625	1-5/8"
BSFI-175	1-3/4"
BSFI-200	2"
BSFI-225	2-1/4"
BSFI-250	2-1/2"

BSFI-275	2-3/4"
