Nylon Lacing Twine MIL-T-713 Type P

Organize electrical wiring with this twisted nylon twine (round cord), made of high tenacity continuous filament yarn. Suited to a wide range of cable organization uses across a spectrum of temperatures. Within this range, use it to bundle your wires and cables, or as a temporary tie-down or fastener, with no worries about it being damaged or degraded by cold or heat. Our Nylon Lacing Twine holds tight in a variety of professional knots and has superior durability, water resistance, versatility, and abrasion resistance. It is suitable for securing wires, camping, gardening, marine applications and more.

Features:

- Temperature range: -67°F to 250°F (-55°C to 121°C).
- Color - Natural and Black
- Finish - No finish and wax finish
- Length - From 1500ft - 4200ft (500yards - 1400yards)
- MORE YARDS PER ROLL last longer
- MADE IN THE USA using the highest-quality polyester and wax coating
