## Safety Shrink Bands

### Safety Shrink Bands

Safety Shrink Bands from BuyHeatShrink are the perfect way to seal any jar, bottle, pharmaceutical, or other container. Safety Shrink Bands give your products a professional look, giving customers peace of mind that your product is safe for use or consumption. Safety Shrink Bands are clearly labelled “Sealed For Your Protection,” to ensure customers are aware of the seal’s intended purpose.

### What are Safety Shrink Bands?

Safety Shrink Bands are unique in their composition, which causes them to melt slightly when heated. This melting causes the shrink bands to form a tight seal around whatever object they are wrapped around. The perforated edge allows for easy removal, while offering a tight and closed seal. The labelled wording surrounding the bands clearly indicate the purpose of the bands to the customer.

### What are Safety Shrink Bands used for?

Shrink bands are commonly used to seal jars, bottles, pharmaceutical containers, and other cylindrical canisters. Industries range from food to cleaning products. Many products require the tamper evident seal that shrink bands provide in order for the sale or shipping of such products. The clear labelling is also optimal for more sensitive products such as pharmaceuticals and other potentially volatile materials.

### Features:

- Safety shrink bands for sealing jars, bottles, pharmaceuticals, and more
- Clearly marked “Sealed for Your Protection”
- Professional look and tamper evident safety seal
- Simply shrink with a heat gun
- Various sizing options for any bottle, jar, or pharmaceutical container

### Dimensions
