## [VT-1100 heat gun with Adjustable temp. dial](#)

Our most Popular heat gun, the VT-1100 Heat Gun is a long-lasting, durable economy heat gun suitable for use with Heat Shrink Tubing, the melting of adhesives, loosening of rusted bolts/nuts, as well as for paint and varnish removal. This UL and CSA approved Heat Gun has a wide temperature range from 250 to 1100°F, controlled by the dial on the back of the unit. Two air speeds make this heat gun a versatile addition to every job site. Use the hanging ring (included) to prop while not in use, or to keep the unit upright for easy shrinking of Heat Shrink Tube. With standard 120-VAC needs, at 1200 Watts, this unit admirably consumes less than a conventional hair dryer.

Part Number	Optional Components
HGUN	VT-1100 heat gun with Adjustable temp. dial
HGUN-CASE	Heavy Duty Carrying case for VT1100 heat gun, with 3 attachments (5/8" concentrator, 3/8" concentrator & shrink tube reflector)
