[Canusa CFW-U Heavy Wall UNLINED heat shrink tubing](#)

What is Canusa CFW-U Heavy Wall UNLINED Heat Shrink Tubing?

Canusa Heavy Wall Unlined Heat Shrink is a thick, corrosion resistant heat shrink tubing. Its thick walls protect the materials inside the tubing from environmental factors such as rain, abrasion, and UV radiation. This particular product is unlined, meaning that it does not contain the insulating adhesive that some heat shrink tubing includes.

What is Canusa CFW-U Heavy Wall UNLINED Heat Shrink Tubing Used For?

Canusa Heavy Wall Unlined Heat Shrink can be used for a range of projects. Due to its thick walls, however, this product is generally used for projects that require burial, submersion, or other environments that would put extra strain on medium or thin walled tubing. These projects include electrical work, industrial machinery, and other heavy-duty applications. **Features:**

- Protects and insulates wire and cables
- Relieve strain and protect mechanics
- Submersible and direct burial applications
- High impact, abrasion, corrosion and chemical resistance
- Simply shrink with a heat gun

Dimensions

Part Number	Diameter	Piece
HS-CFW-U-0750	3/4"	25 FT/SPOOL
HS-CFW-U-1100	1.1"	25 FT/SPOOL
