EMI RFI Shrink-N-Shield

What is Shrink-N-Shield Zipper Tubing?

Shrink-N-Shield Zipper Tubing is a flame retardant heat shrink material used for cable management. When exposed to heat, Shrink-N-Shield melts to half its original size (2:1), binding around the materials inside of the tubing. This melting creates a seal that binds wires together for quick and easy cable management.

What is Shrink-N-Shield Zipper Tubing Used For?

Shrink-N-Shield Zipper Tubing is primarily used for cable management in machinery. Easy, one-step installation allows the user to bind and manage wiring and cables in minutes. For that reason, Shrink-N-Shield is perfect for job sites, large and small DIY projects.

Features:

- Easy one-step installation
- High performance mil-spec jacketing
- Excellent high frequency EMI shielding
- Government listed NSN's
- Lower total installed costs

Dimensions

Part Number	Diameter
HSZT-0188	3/16"
HSZT-025	1/4"
HSZT-0375	3/8"
HSZT-050	1/2"
HSZT-075	3/4"
HSZT-100	1"
