Low Profile Cable Ties

Features:

Our low profile Nylon wire ties are simple to use, featuring a parallel insertion angle, where the tie is locked parallel to the cable tie body, eliminating sharp edges. Unlike traditional nylon cable ties that lock perpendicular to the tie body, thus leaving the excess material sticking straight out, our in-line ties are safe to use in playgrounds and any other areas where child safety is a concern. An added benefit is the 120 pound loop tensile strength, making these wire ties the only heavy duty cable ties in our line that are available in bright neon colors. These colored cable ties are specifically formulated to match bright colored playground foam and other child protection devices.

Dimensions

Part Number	Length	Bag	Nominal Size	Actual Length	Min Loop Tensile	Max bundle Diameter
CTLP-07-1000	7"	1000 PCS/BAG	7"	7.5"	50 LB	2.0"
CTLP-14-120LB	14"	100 PCS/BAG	14"	14.6"	120 LB	4.0"
