Perforated Clear Shrink Bands 2" Height

2" Height Perforated Clear Shrink Bands

Perforated Clear Shrink Bands from BuyHeatShrink are the perfect way to seal any jar, bottle, pharmaceutical, or other container. Clear Shrink Bands give your products a professional look, giving customers peace of mind that your product is safe for use or consumption.

What are Perforated Clear Shrink Bands?

Perforated Clear Shrink Bands are unique in their composition, which causes them to melt slightly when heated. This melting causes the shrink bands to form a tight seal around whatever object they are wrapped around. The perforated edge allows for easy removal, while offering a tight and closed seal.

What are Shrink Bands used for?

Shrink bands are commonly used to seal jars, bottles, pharmaceutical containers, and other cylindrical canisters. Industries range from food to cleaning products. Many products require the tamper evident seal that shrink bands provide in order for the sale or shipping of such products.

Features:

- Clear shrink bands for sealing jars, bottles, pharmaceuticals, and more
- Professional look and tamper evident safety seal
- Simply shrink with a heat gun
- Perforated for easy removal
- Various sizing options for any bottle, jar, or pharmaceutical container
- Also available: [1" Perforated Clear Shrink Bands \(28mm\)](#)
