Polyethylene Slit Corrugated Loom PET Tubing | Slit Loom

Corrugated wire loom is a cost effective product that manages unruly cables and wires while providing excellent coverage and protection. Our high-quality polyethylene (PET) tubing with corrugated ridges provides cables and wires with a degree of protection from light foot traffic, while providing the aesthetically pleasing effects of cable management. Slit Wire Loom is made from high-quality polyethylene material to provide a durable yet flexible product with great abrasion, impact and temperature resistance, for use in a wide range of general purpose applications. This split wire loom is the perfect alternative to braided sleeving and spiral wrap when ease of installation and full coverage protection are essential. Pre-slit for quick and easy installation over new or preexisting cables.

Features:

- Corrugated wire loom is a cost effective product that manages unruly cables and wires while providing excellent coverage and protection.
- Our high-quality polyethylene (PET) tubing with corrugated ridges provides cables and wires with a degree of protection from light foot traffic, while providing the aesthetically pleasing effects of cable management.
- Slit Wire Loom is made from high-quality polyethylene material to provide a durable yet flexible product with great abrasion, impact and temperature resistance, for use in a wide range of general purpose applications.
- This split wire loom is the perfect alternative to braided sleeving and spiral wrap when ease of installation and full coverage protection are essential.
- Pre-slit for quick and easy installation over new or preexisting cables by hand or with a convenient, simple-to-use wire loom installation tool.
