## Start International TBC50-H Non-Fraying Hot Knife Cutter

The Heavy Duty TBC50H automatically dispenses, measures, cuts and heat seals those non-adhesive materials most prone to fraying.

With durability at its core, this machine makes heavy production easy. Cut ribbon, webbing, strapping, rope, belting, sleeving, etc. with cuts up to 3.54" (90mm) in width, or multiple rolls.

The high speed operation of this unit cuts up to 140 pieces per minute at 2" (50mm) in length.

### Features:

- Includes a HOT KNIFE
- This machine is designed for cutting and sealing the ends of material that might fray
- Adjustable temperature control
- Cut up to 3.54" (90mm) wide material or multiple rolls
- High speed - can cut up to 140 pieces per minute at 2" (50 mm) in length
- All electric microprocessor controlled
- Automatic shut off - stops automatically if material runs out during operation
- Easy to use - set length, quantity and feed speed; then press start
- Adjustable pressure on feed roller for thin or smooth materials
- Accuracy - by means of stepper motor
- Cutter safety guard included
- No tooling required to cut different materials
- Cutting blade is made of high-speed steel (HSS)
